

TO SOUTH POLE VIA AIRPLANE

Explorer Plans the First
Flight to Antarctic—
to Stay Five Years.

IS RICH IN MINERALS

Vast Treasures Await Men
With Courage to Combat
Climate's Opposition.

LONDON, March 20.—For the first time in history, according to announcement made here recently by John L. Cope, F. R. G. S., an airplane will be used in an attempted flight to the south pole. The flight will be made in June on the Terra Nova, as head of the British Imperial Antarctic expedition, and will spend five years in the Antarctic studying conditions. The expedition is purely scientific.

The flight will be made, Cope announced, about Christmas day this year, and will be accomplished in two stages. The airplane, carrying three men, a sledge, provisions, tent, and all equipment, to enable the men to walk back to their base in event of any accident happening during the journey, will start from the great ice barrier in the Bay of Whales and fly to the foot of the great ice mountains, where there are peaks which rise to more than 11,000 feet. There all surplus stores and petrol will be landed so as to lighten the machine for the flight over the mountain range.

Not Done for "Stunt."

"This flight," Cope said, "is not being made merely as a stunt, if I may use that word. It is intended to take photographs from the air during the whole journey, and to chart the interior."

After the flight to the south pole has been accomplished, Cope said, the airplane will be taken back to the ship, and at Wellington, New Zealand, will be overhauled. The ship will bring the plane back to the ice in the following summer season, and during the next four seasons it will be used whenever possible to make flights over the continent. By using an airplane Cope is convinced that the scientists accompanying the party will be able to accomplish in one season as much work as could be accomplished in four seasons by the methods hitherto adopted.

During the time that the Terra Nova is circumnavigating the Antarctic the airplane will be in use, flying from the ice to lands hitherto unexplored and uncharted.

KEEP LOOKING YOUNG

It's Easy—If You Know Dr.
Edwards' Olive Tablets

The secret of keeping young is to feel young—to do this you must watch your liver and bowels—there's no need of having a sallow complexion—dark rings under your eyes—pimples—a hilly look in your face—dull eyes with no sparkle. Your doctor will tell you ninety per cent of all sickness comes from inactive bowels and liver.

Dr. Edwards, a well-known physician in Ohio, perfected a vegetable compound mixed with olive oil to act on the liver and bowels, which he gave to his patients for years.

Dr. Edwards' Olive Tablets, the substitute for calomel, are gentle in their action yet always effective. They bring about that natural buoyancy which all should enjoy by toning up the liver and clearing the system of impurities.

Dr. Edwards' Olive Tablets are known for their olive color. 10c and 25c.

Explorer Andrews and Wife are Back From Trip to Wilds of Mongolia

Mrs.
Ray
Chapman
Andrews

Mrs. Andrews, who is quite as intrepid an explorer as her husband, recently returned with him after months spent in the heart of Mongolia, a country of which little is known by the outside world. Mrs. Andrews acted as official photographer, taking moving as well as "still" pictures. In this photograph she is shown holding a small native squirrel. Mrs. Andrews brought back many valuable animal specimens, which will be placed in the Asiatic hall of the museum of natural history, New York.

WORKERS DO NOT FAVOR THE REDS

So Says Employer Who
Lived and Labored With
Men for Seven Months.

BOSTON, March 20.—Walking and living for seven months side by side with coal miners and workers, shipbuilders and common laborers, who are the most critical men in the world, the most serious danger to the world is not in this country of our workers, who at the present moment are being better educated and more intelligent than ever before. What is the danger? It is not the danger of the workers, but the danger of the employers who are not doing for the most part what they should do for the workers.

There are three things that are in the mind of the workingmen today. The first is the desire for a better life. The second is the desire for a better education. The third is the desire for a better future.

It was the longest trial anyone has ever put in in his life," he said, "and because a few companies were named about this country of ours when they did not get into and everybody arrived from the bottom of his heart that the worst indictment a man could make was that he stood ready to give full value in exchange for bread for his wife and children and found nowhere a market for that value."

I learned in these seven months that the worker as a whole is not just a shrewd, but a wholehearted, and does not want an over-taken more than you or I. If he ever becomes dishonest it will be the result more of bad strategy on our part and good salesmanship on the part of the employer. As I see it, there is no danger in the world today except the danger of the workers who are not doing for the most part what they should do for the workers.

on the part of the employer. As I see it, there is no danger in the world today except the danger of the workers who are not doing for the most part what they should do for the workers.

There are three things that are in the mind of the workingmen today. The first is the desire for a better life. The second is the desire for a better education. The third is the desire for a better future.

IF KIDNEYS AND BLADDER BOTHER

Take Salts to Flush Kidneys
and Neutralize Irritating
Acids.

Kidney and bladder weakness results from uric acid, says a noted authority. The kidneys filter this acid from the blood and pass it on to the bladder, where it often remains to irritate and inflame, causing a burning, stinging sensation, or setting up an irritation at the neck of the bladder, obliging you to seek relief two or three times during the night. The sufferer is in constant dread, the water passes sometimes with a scolding sensation and every profusion, again, there is difficulty in voiding it.

Bladder weakness, most folk call it, because they can't control urination. While it is extremely annoying and sometimes very painful, this is really one of the most simple ailments to overcome. Get about four ounces of Jad Salts from your pharmacist and take a tablespoonful in a glass of water before breakfast, continue this for two or three days. This will neutralize the acids in the urine so it no longer is a source of irritation to the bladder, and urinary organs which then act normally again.

Jad Salts is inexpensive, harmless, and is made from the acid of grapes and lemon juice, combined with lithia, and is used by thousands of folk who are subject to urinary disorders caused by uric acid irritation. Jad Salts is splendid for kidney and causes no bad effects whatever.

Here you have a pleasant effervescent lithia-water drink, which quickly relieves bladder trouble. Advt.

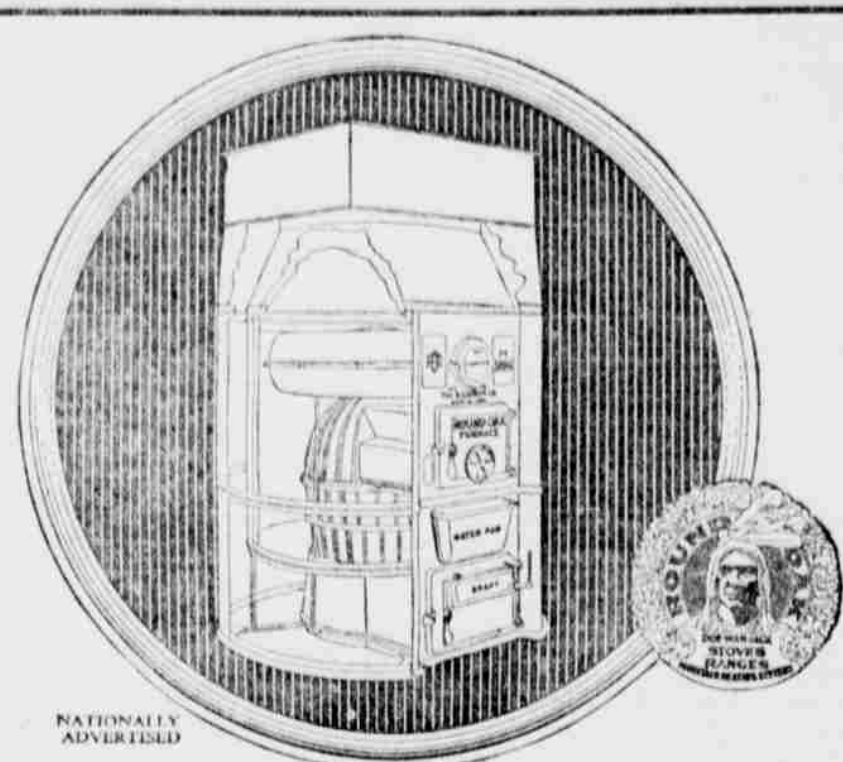

HANSON'S BLUFF IS GOOD

Blockers More Afraid of His First
Than of the Police.

WASHINGTON, March 19.—The Hanson bluffing is good. It is the bluffing of a man who is not afraid of the police.

while addressing a large mass meeting under the auspices of the War Labor Council.

and were about to be pounced on by a stalwart policeman, Mr. Hanson waved him aside, saying, "I'm able to take care of the four of them. Talking is about the poorest thing I can do. I can do many other things." The listeners were not heard from again.

It Does Not Leak Gas, Dust, or Smoke!

The air is always warm and clean, never "gassy"—the housecleaning is never made a burden by fine soot and ashes settling everywhere—when your home is heated with a Round Oak Pipeless Furnace. It is bolted gas-

tight for life—and "life" in its case means a whole generation. Everything the Round Oak folks make is good—as 2,000,000 purchasers can testify. This furnace is easy to install, easy to operate, and "easy" on fuel of any kind.

ROUND OAK PIPELESS FURNACE

Arrange for yours now before prices advance and a shortage occurs due to the building boom. We can also make very liberal terms on immediate contracts.

The Favorite— A Hot Weather Gas Range

ONE of the most attractive features of our FAVORITE GAS RANGE is its distinct ability to aid in kitchen cleanliness during the hot months of Spring and Summer.

ITS improved construction allows it to be cleaned thoroughly and easily with a minimum of exertion and trouble. The white enameled oven comes out entirely, to be washed as a china dish. The white enameled drip pan fits snugly and also is easily removed and cleaned.

WITH these unusual conveniences, the FAVORITE is truly a hot weather gas range. Since it is necessary to cook in summer, it is to your advantage to select a range that minimizes the heat of cooking and cleaning. The FAVORITE GAS RANGE does both.
